Educational Leadership, M.Ed.

A cohesive sequential delivery structure driven by problem-based and problem-centered learning activities is provided. Program anchors include teaching and learning, technology, assessment, diversity, Social/Emotional Learning, law and public policy, and collaboration. Focused Practicum experiences are integrated with course content and additional field practicum experiences are structured to prepare the candidate for the work of an educational leader. These experiences in the educational setting are designed for candidates to work closely with mentors who are practicing school leaders engaging in authentic administrative tasks. Reflection is embedded throughout the program to enable candidates to reflect upon and improve practice.
