

Supportive Resources for Students during Pregnancy, Childbirth, and/or Related Conditions

Mississippi College (MC) seeks to provide a supportive environment that provides students access to their education programs when experiencing pregnancy, childbirth, or a related condition. Students should contact the Title IX Coordinator to learn what supportive resources MC can offer students. Students experiencing pregnancy who anticipate a need for assistance with their education program should discuss their situation and needs with the Title IX Coordinator rather than individual faculty members. The Title IX Coordinator will coordinate with other offices on campus to provide the student support and assistance while experiencing pregnancy, childbirth, and related conditions. MC can make reasonable modifications to policies, procedures and programs to assist the student. Pregnant students living in university-owned or controlled residential properties will not be involuntarily removed due to pregnancy.
